

BeautyVerify

- AI-Powered Beauty Product Authentication System
- Buy Beauty Products With Confidence

Problem Statement

- Online beauty shoppers face counterfeit and expired products with no reliable verification system.

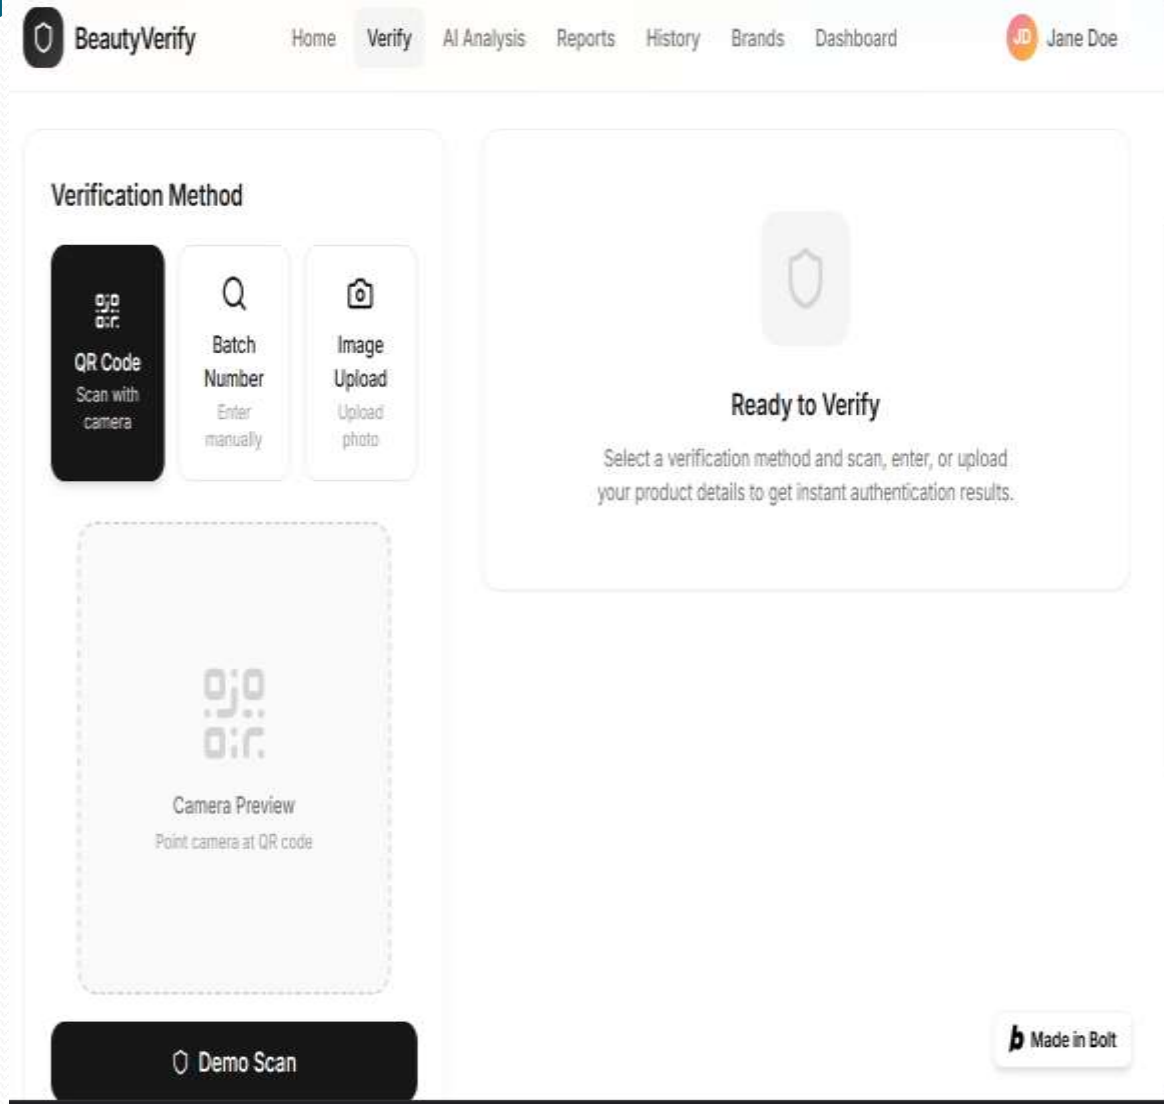

Solution

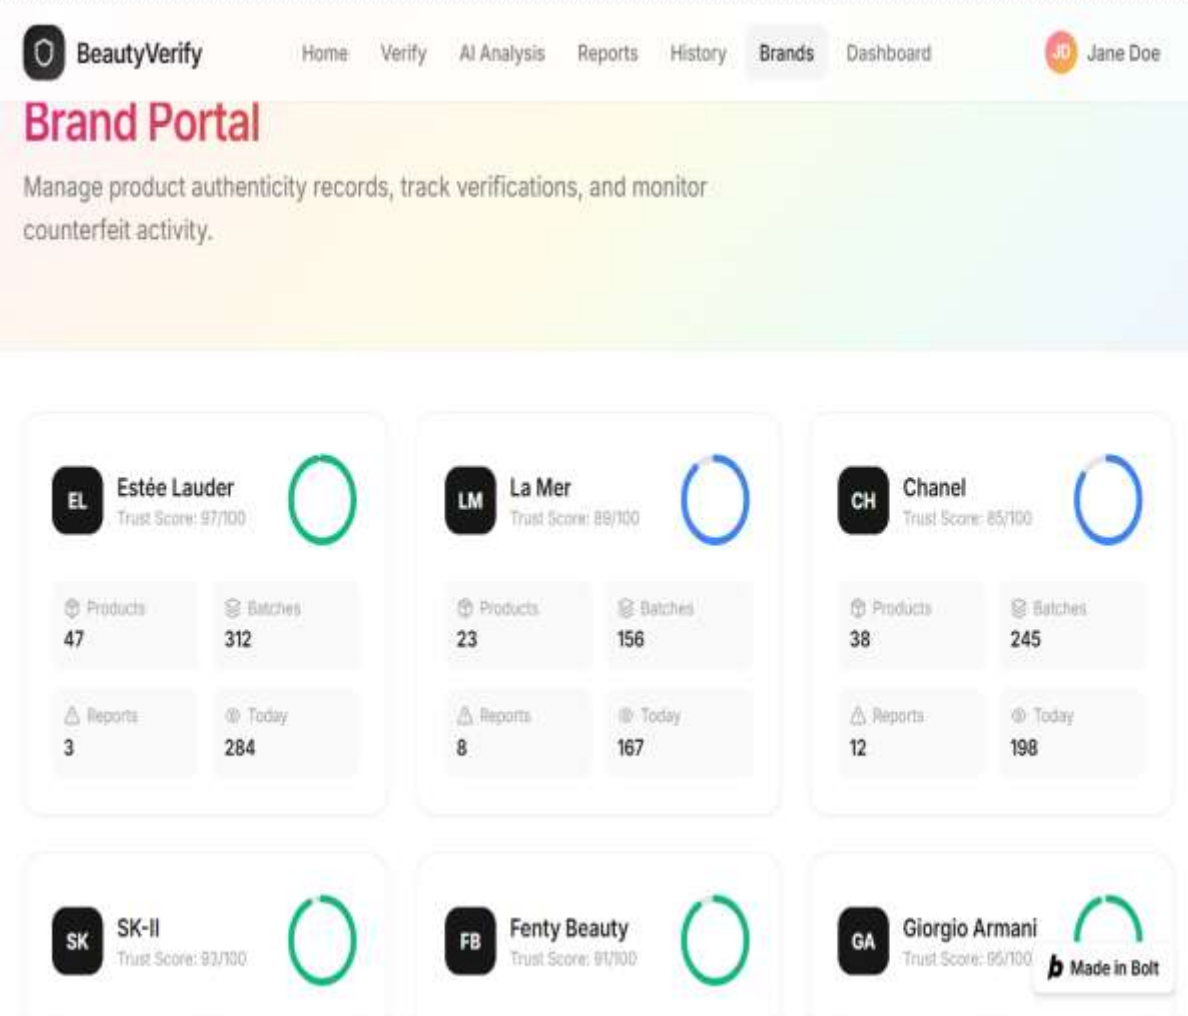

- AI-powered platform using QR scan, batch verification, and packaging analysis to verify authenticity.

How It Works

1. User selects a verification method.
2. Scan QR code or enter batch number.
3. Upload product packaging image.
4. AI analyzes authenticity markers.
5. Instant verification result is generated.

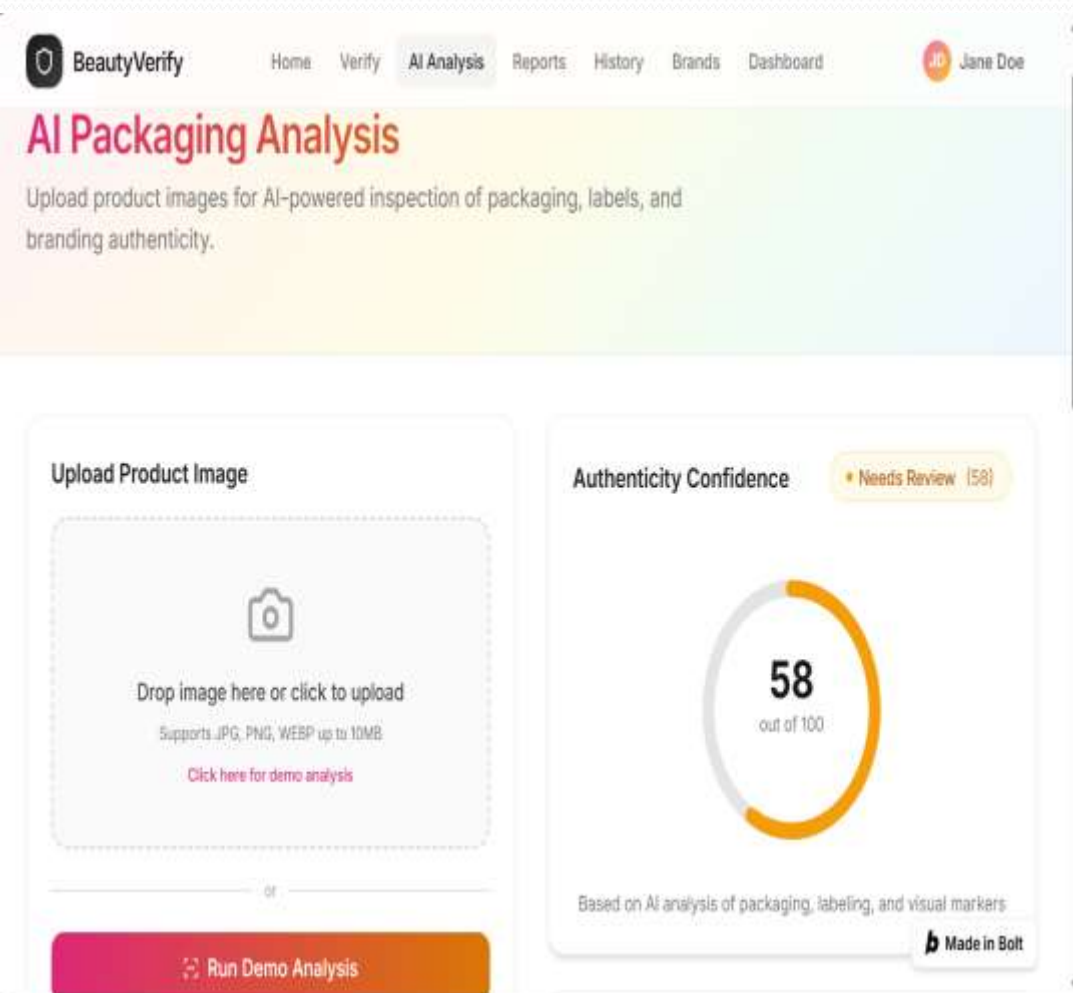

Key Features

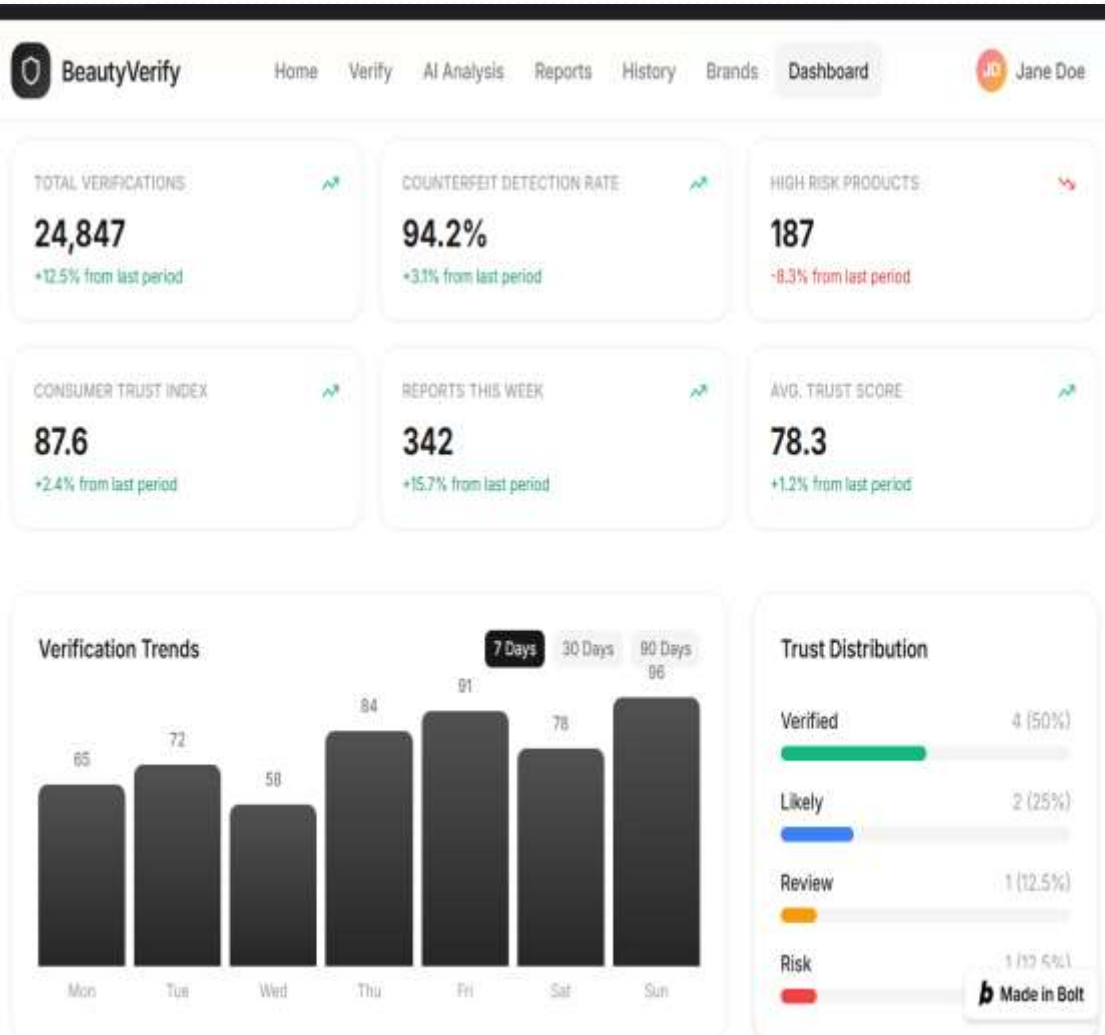

- QR Verification
- AI Packaging Analysis
- Trust Score System
- Brand Verification Portal
- Consumer Reports

AI Analysis System

1. Analyzes packaging, labels, and visual authenticity markers
2. Detects inconsistencies in branding, colors, seals, and batch codes
3. Provides an authenticity confidence score with detailed findings

Trust Score

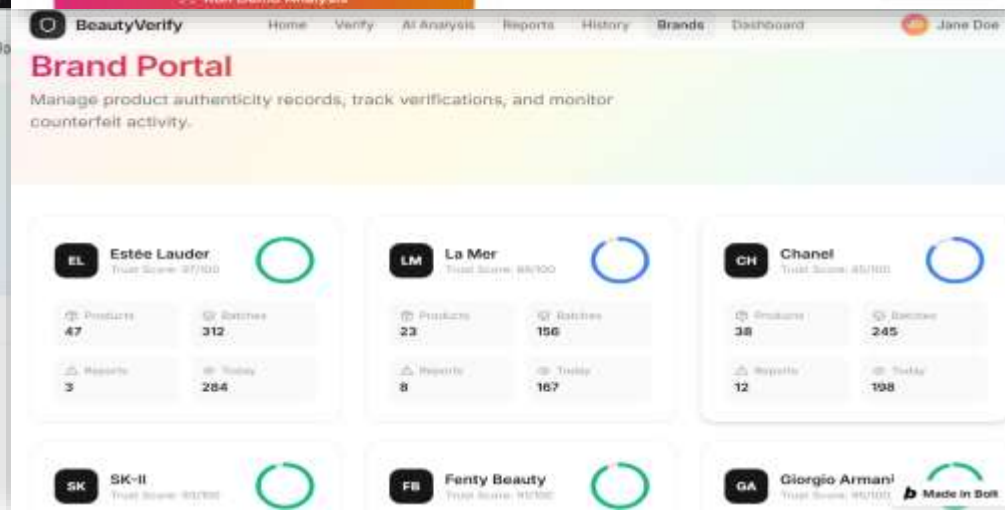

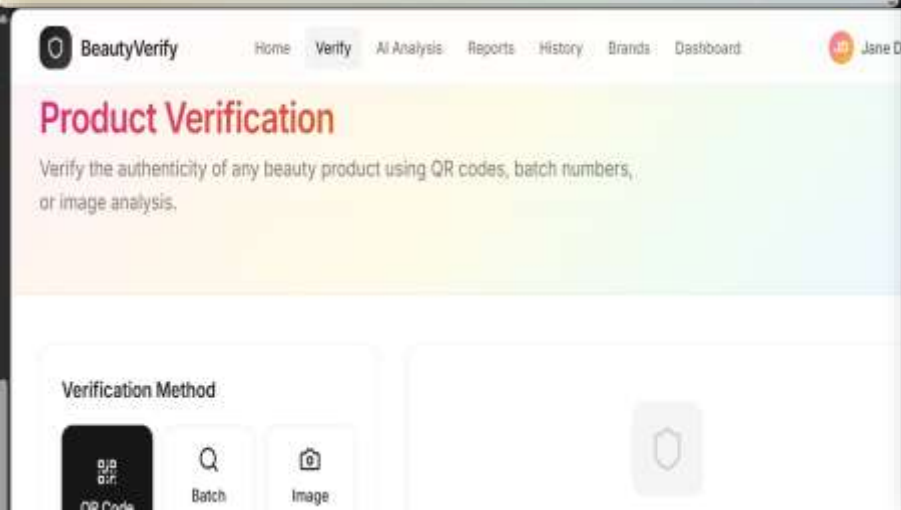

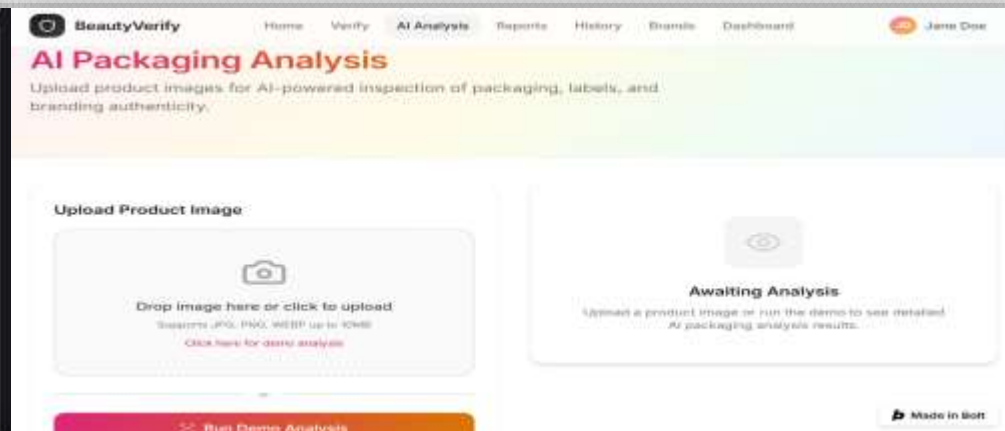

- AI-generated Trust Score (0–100)
- Based on packaging and batch analysis
- Detects authenticity and risk level
- Provides purchase recommendations

Impact

- Protects consumers from counterfeit beauty products
- Increases trust in online beauty purchases
- Helps brands identify and monitor fake products
- Reduces health risks from unsafe cosmetics
- Promotes transparency in the beauty industry

Demo Screens

Key interfaces showcasing the complete Beauty Verify workflow from product scanning to AI-based authenticity results and brand monitoring.

Conclusion

- Safe and trusted beauty shopping using AI verification system
